Goose Prairie Marsh Water Level Management

DNR Survey Information Notes:

Date of Survey	Water Surface Elevation	Survey Max Depth	Survey Mean Depth
July 2009	1206.91	7.0 feet	4.8 feet
July 2012	1205.23	5.5 feet	3.5 feet

Potential Maximum Drawdown Elevation: 1203.6 feet

Possible Water Level Management Plan*

October 15 – March 15** - Initiate and Complete Drawdown to 1203.6.

March 15-April 15 – Flood Pool

April 15-May 1- Drawdown

May 1- Aug 15*** - 1203.6-1205.0(variable by year and dependent on management objectives/ OHW/current run out elevation)

Aug 16- Oct. 15 – 1204.6-1205.0

---

* Tentative For Discussion Purposes

** Objective would be to allow water for hunting access but complete or nearly complete drawdown by freeze up

*** Objective would be to minimize bounce/ sudden water level changes during this period
